**THE CUTTING EDGE OF THE INTERNATIONAL ASSOCIATION OF
CONSCIOUSNESS RESEARCH**

NEW CONSCIOUSNESS RESEARCH IS COMING OUT OF BRAZIL

The Motto of CIPRO in Brazil is “Experience it for yourself”

We have known for forty years that the mind can change the brain. In 1969 Nature published an article by Paul Bach-y-Rita documenting that mental training can reprogram the brain so that blind people can see. In 2001 a Nobel Prize was given to the scientist showing that the mind can turn on and off DNA. In 2009 Michael Merzenich is developing computer software to treat autism, aging, and memory loss. Scientific American, in February 2009 acknowledged that the Universe is “non-local”, opening the door to the possibility that our minds came first, and then the physical world followed afterwards.

IT IS COMMONLY PERCEIVED THAT SCIENCE DEBUNKS THE SPIRITUAL NATURE OF MAN. THIS IS NOT TRUE ANYMORE

The foremost scientists in the world, such as Robert Lanza MD are saying that this is a Conscious Reality that uses the material world as a means to interact with each other.

So why isn't this widely understood? Because this isn't “common sense” to us.

The Brazilian approach of the CIPRO group, led by Professor Waldo Vieira, is to change what is common sense. They have taught over 200,000 people to have out of body experiences in the past 10 years.

The Institute Internacional De Projeciologia e Conscienciologia is dedicated to teaching the general public how to have the out of body experience. As of August of 2008, they had taught 197,000 people to have the experience in their “Cognopolis” in Brazil.

Wild? Flamboyant? You bet! Yet don’t let that distract anyone from realizing that this is a serious group of scientists and physicians who are actively researching the clinical and brain aspects of quantum non-locality.

They have two significant missions: 1) Training the general public to have the out of body experience. They have no religious or spiritual hidden agenda. Their founder Professor Vieira is up front about living dozens of past lives and remembering them all. 2) Studying the brain science of the out of body experience. The young scientists and physicians who are the intellectual core of his organization are just as up front about saying “If Professor Vieira believes in reincarnation, that is a phenomena to be studied. If we insist that everyone believe what he believes that is (unacceptably) religion.

We will not understand the recent scientific advances of the past twenty years, and actively integrate into our culture and personal lives, unless we are able to do what the Brazilians are doing. Change the worldview of the culture.

The Brazilians Keep Alive the Tradition of Spirit Based Medicine!

The Brazilian Spiritists, led by Dr. Marlene Nobre follow the work of Physician/Medium Allan Kardec from the 1800s. Their motto is “First we must be excellent physicians”.

The Brazilian Spiritist Organization of retired Obstetrician/Gynecologist Dr. Marlene Nobre, and the Albert Einstein Brain Science Research Institute, in Sao Paolo, are also doing this outstanding work at using science to change the spiritual consciousness of the world. The Brazilian Spiritist Organization, which has common roots with CIPRO, has recently held their second Spiritist Medical Conference in the United States (October 2008)

1 Dr Morse and Dr Peres and their families

2 Marlene Nobre MD and Dr. Morse’s family

They do also have a sister organization which is starting to teach the out of body experience in the United States and Europe. It is run by the husband and wife team Wagner Alegretti and Nanci Trivellato, The International Academy of Consciousness (iac.org).

Dr. Alegretti did a brilliant study of out of body perceptions in which the viewers successfully viewed a wineglass. A pdf file of this study is in the references page of this website. It was done with 200 viewers in Spain, and remains one of the best scientific studies of “out of body perceptions / remote viewing” in the literature.

What to say about Professor Waldo Vieira? Oy vey. Well he did dramatically interrupt his talk to directly look at me, and speak clearly in English (His talk was in Portuguese) and say “old friend, it is so good to see you again”. Since I had never met him before, I was a little astonished. When I asked him about it later, he stated that if I didn’t remember our past lives together, it was not up to him to remind me!

He has also written one of the most definitive books on spiritual phenomena called Projectology. It is

800 pages jam packed with excellent discussions and descriptions of every psychic phenomenon you can imagine, and it is in both English and Portuguese. Any consciousness researcher needs a copy of it, and you can get it through his organization. It is a nice example of how out of body experiences occur to the right brain, as it is a gigantic list of every spiritual and psychic phenomena every reported in any culture, but absolutely NO ANALYSIS. It is a marvelously pure right brain text and I know of no other work like it.

Professor Vieira’s life seems to have been lifted directly from a Jorge Amado novel about Brazil. He is fascinating, completely ego driven, and yet astonishingly child like and “clear” of the effects of his ego on his organization. He seems to have found that perfect balance of crazed ego driven ambition coupled with the ability to inspire a second generation of scientists and physicians who have created an organization that will continue on independent of him. Not an easy thing to achieve.

Here are some other pictures of Belo Horizonte, and my

CIPRO visit. Left is Dr. Alegretti. Right is Dr. Roberto, who is an Intensive Care Unit Physician who works with Professor Vieira.

(To the left is the CIPRO brain trust.) Right is Dalmo, one of their hundreds of volunteers. Dalmo is a typical CIPRO member, highly educated and intelligent. He does some sort of specialized highly technical stuff he explained to me again and again and I didn't get what exactly it was expect it was left brained.

This is one of the greatest lessons the United States can learn from Brazil. Our cultural attitude is that exploring spirituality, remote viewing and out of body states is for “woo-woo types” who are not intellectual or analytic, but rather willing to believe anything. Most scientists in this country would be turned off immediately by the flamboyant nature of Professor Vieira and dismiss anything he had to say.

In Brazil, it is the intellectual elite who study and understand spirituality. They immediately understand the association between quantum non locality and the ability to remote view or have out of body perceptions. Never was this more obvious when I was recently in Boulder Colorado. In Boulder, they described themselves as isolated against the rest of the country because they attempted to understand non locality and spirituality. In Brazil, Dalmo is the poster child for the typical person learning about spirituality, highly analytic, left brained, and extremely intelligent.

**BRAZILIAN MEDICAL SCHOOLS ARE THE BEST OF THE WEST AND INTEGRATE
SPIRITUAL PRACTICE INTO THEIR CURRICULUM**

While in Brazil, I also lectured at the Federal Medical School in Sao Paulo. I lectured with Dr. Erlander Haraldsson. Dr. Haraldsson has extensively investigated children who report past life memories.

Dr. Haraldsson to my left, and Amantino de Freitas in my immediate left

BUT WHEN THEY REMOTE VIEW, ARE THEY OUT OF THEIR BODIES?

We will never know until we can get the CIA/IRVA remote viewers to meet with and talk to the CIPRO projectologists.

The military intelligence remote viewers are identical in technique and philosophy to the CIPRO group. Like the CIPRO group, they work in teams. Like the CIPRO group, their motto is “Doubt all data” meaning the mental events during the viewing or out of body experience. Like the CIPRO group they acknowledge that the experience is right brained, so the difficulty is in remembering and accurately recording the experience in pure right brain terms to prevent analytic overlay. Like the CIPRO group, they have done considerable scientific research documenting that remote viewing is a non-local perception which is real and verifiable.

WE NEED TO GET THESE TWO GROUPS TOGETHER AND START TALKING TO EACH OTHER!

Even Scientific American has finally admitted that quantum non-locality is real. (February 2009). Yet no one, except those who have had near death experiences, have actually been proven to have regularly visited this quantum non-locality. Except CIPRO and the military intelligence remote viewers, and those who have had near death experiences.

THE PROOF OF MODERN THEORETICAL PHYSICS RESIDES IN THE CIPRO GROUP IN BRAZIL AND THE CIA CONTROLLED REMOTE VIEWING PROGRAM

There are less than a 100 persons trained by the military intelligence protocols who can reliably remote view in a reproducible and verifiable way, in the world today. They are probably just as few members of CIPRO who can similarly go out of the body and return with verifiable details.

IS THIS THE PROBLEM?

IS IT A CLASH OF CULTURES?

IF SO, BOTH GROUPS HAVE TO GET OVER THIS

THEY HOLD THE OBJECTIVE SCIENTIFICALLY VERIFIABLE PROOF OF SOME OF MANKIND'S OLDEST SPIRITUAL DILEMMAS

I HAVE MADE A PERSONAL VOW THAT I WILL NOT STOP UNTIL THESE GROUPS ARE TALKING

And come on, who doesn't want to see Ed Dames, former CIA remote viewer who now visits aliens go one on one with CIPROs Jean Pierre Bastiou, the Out of Body Consciousness Globe Trotter!
